

# Transform your Industry & Improve Document Workflows With eSignatures

jSign is an electronic signature solution that offers a cost-effective way to implement a solid, secure, and reliable e-signature process into your organization's document workflows. Blockchain technology adds a unique layer of protection and process tracking that can stand up to a legal challenge.

jSign offers APIs for all its major capabilities. This allows our ISV, SaaS, and software partners as well as enterprise clients to integrate eSignature capability in their applications or provide integration options to their clients. jSign meets regulatory requirements, provides an audit trail with a verified signing certificate, enhances document workflows, and guarantees the authenticity of clients' documents.

With jSign e-signature APIs, integrations into mission-critical applications are simple and more cost-effective – and do not need to fit into a full ecosystem of applications – as other products require.

## jSigns API is Available to Partners Serving Major Industries

### Financial Services

jSign's reliable electronic signature service provides industry-compliant e-signing for finance and banking. Our security features, such as blockchain stamping, audit trails, and two-factor authentication, ensure the authenticity of signatures and documents. jSign APIs can be integrated into workflows such as

- Redemption requests
- Account forms
- Agreements
- Change of beneficiary forms
- Contracts
- Delegations of authority
- Legal documentation
- Compliance processes

### Insurance

jSign's electronic signature service can significantly reduce the time spent on insurance claims, policies, and appraisals. eSignatures provide competitive advantages for insurance agents, resulting in faster onboarding and claim settlement transactions. jSign APIs can be integrated into these workflows and more:

- Claim and Appraisal forms
- Onboarding agents and customers
- Quotes & Agreements
- Policy applications
- Prior Authorizations
- Account maintenance forms

### Real Estate

jSign expedites the signature process, allowing agents to sign and send contracts on any mobile device and close deals on the go. jSign APIs support integrations in these workflows and more:

- Pre-approvals, offers, and counter-offers
- Mortgage forms
- Leases and rental agreements
- Name and seller's affidavits
- Residential and Closing disclosures

## Healthcare

jSign's HIPAA-compliant electronic signatures provide a better care experience for patients and healthcare staff by processing forms, claims, and pharmaceutical documents quicker and easier. jSign APIs can be integrated into payers' or providers' workflows, such as:

- Automate Patient Form Fill
- New patient forms
- Claims processing
- Prior authorizations
- Admissions
- Consent forms
- Referrals

## Legal

jSign allows law firms to collect signatures and organize documents more efficiently, easily, and safely than ever before, complying with governmental regulations. jSign APIs can be integrated into systems processing these workflows and more:

- Court submissions
- Agreements
- NDAs
- Legal forms
- Onboarding new clients

## Accounting

jSign offers electronic signature solutions specifically designed for the accounting and tax services industry, providing security features such as audit trails, blockchain stamping, and two-factor authentication to ensure the authenticity of signatures and documents. With jSign, completing services becomes faster, easier, less challenging, and can support workflows like:

- Loan and mortgage applications
- Account opening and contracts
- Subscription documents
- Trade confirmations
- Delegations of authority

## Human Resources

jSign API services facilitate the automation of HR processes for efficient form and document approvals. Featuring sophisticated capabilities such as automated form-fill, HR systems can auto-populate form fields, present the form to a signer, and enable them to make real-time corrections. Upon submission of the updated form, jSign APIs send the signed document to the requesting system, along with the corrected information. This eliminates manual database updates, saves time, and mitigates errors. Moreover, jSign APIs enhance workflows by:

- Non-disclosure agreements (NDAs) -
- 1099 forms
- Offer letters
- W2 workforce contracts
- Acknowledgment letters
- Onboarding forms

## General API Features

jSign API services are HIPAA compliant and can meet requirements for medical workflows. With jSign APIs, clients can build custom signature processes for their unique workflows. The following key features can be accessed via the jSign API services:

- Send requests to sign your key documents
- Create a solid audit trail & prevent signature tampering with blockchain technology
- Manage users, reporting, and analytics with the admin portal
- Configure two-factor authentications through mobile number & email
- Enforce signer location with GPS (lat/long) while signing an envelope
- Track the entire signature process, get updates, and a certificate of completion
- Build business rules, such as signing sequentially, in parallel, or in hybrid signing order
- Set due dates and send reminders while creating an envelope
- Save signed documents in the jSign cloud for easy reference
- Integrate with Dropbox and Google Drive for easy storage
- Supports popular file formats: doc, .docx, .pdf, .xls, .xlsx, .ppt, .pptx, .jpg, .bmp, .png.

## jSign API is easy to integrate

jSign APIs are easy to integrate and follow RESTful framework, future-proofing development. Consensus Cloud Solutions offers well-documented APIs and white glove onboarding support for faster implementation.

## Your Consensus team is available for an integration consultation

Managing an entire system infrastructure and its integration needs can be complicated, time-consuming, and labor-intensive. With ever-changing objectives, new standards, protocols, and demand for meaningful data exchange, the IT environment has become more challenging than ever, especially for organizations with limited staff.

Our team of experts has extensive technology, industry knowledge, and proven experience working with vendors and third-party systems. To schedule a consultation or learn more, contact your on-boarding team today.
